What Is A Hackathon?

A hackathon is a 24-48 hour invention marathon, where students can form teams and create anything they want. (Think a tech science fair but you only get 24 hours)

Our Mission

Our goal for this hackathon is to provide an opportunity where young students can use their creativity, and through technology, **create**, **compete**, and most importantly, **collaborate**.

Where You Come in

Hackathons are **free**, meaning we need sponsors in order to cover food, merchandise, prizes, and everything else needed to make sure the hacker's have the best experience possible

Why Sponsor?

By sponsoring Keep Austin Hacking, not only will you be giving young students the opportunity to **learn** and **create** with technology, but you will also be leaving a **lasting impression** of **your brand** on the **creators of tomorrow**.
